

MINISTRIES OF JESUS

What It Is and Is Not

It is the mission of the Ministries of Jesus to provide care that ministers to the whole person---spirit, soul and body, since factors in all of these areas affect a person’s health or well-being. Therefore, information will be gathered by Ministries of Jesus staff which will identify your needs in each of these areas. Truthful information will be most helpful in identifying these needs.

All Ministries of Jesus providers are volunteers and provide free services without discrimination of any kind. Doctors are not available all of the time at this clinic; they come for short periods as professional and personal time allows. Therefore, do not depend upon them as “family doctors.” The services of the Ministries of Jesus should be used along with other medical providers, or until other resources are found and/or circumstances change.

Because the Ministries of Jesus depends solely on donations and volunteers, specialized services may not be available through this clinic, and referrals to outside sources may be necessary. Fees and methods of payment will be determined by the outside sources and the client will be responsible for making payment arrangement with the outside agency/provider.

The Ministries of Jesus does not handle clients with “on-the-job” injuries, those seeking Social Security disability, or those seeking legal action of any kind.
